Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention teaches a method and system of storing formatted scene candidates identified from received video data. Each independent claim identifies the distinct feature of storing the formatted scene candidates on the optical storage media in a media structure without reducing the recordable capacity. The closest prior art, Dimitrova et al. U.S. Patent 6,137,544, teaches a video indexing system that creates a visual index from extracted representative video frames and stores the created index on a media structure such as a predetermined portion of an optical storage media, i.e. a DVD. The prior art fails to teach the visual index consisting of video scenes, i.e. frames, are stored in a media structure without reducing the recordable capacity of the DVD; specifically, the prior art fails to teach the index being stored in sectors allocated to store additional information that may be used for interchange between data interchange parties and are not part of the recordable capacity of the DVD disc. Thus, the prior art fails to anticipate or render the above limitations obvious.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
